Summary

Junior Angular Frontend Developer dedicated to building responsive, scalable, and user-friendly web applications using Angular, TypeScript, RxJS, and modern UI frameworks. Experienced in developing component-based architectures and integrating RESTful APIs for optimal performance. Currently expanding software engineering expertise into full-stack development with .NET technologies.

Work Experience and Internships

Angular Frontend Developer Trainee at Netpoint July 2026 – Present

- Developing and maintaining dynamic user interfaces using Angular, TypeScript, RxJS, and modern UI frameworks.
- Collaborating on modular, component-based architectures and integrating RESTful APIs for real-time data flow.
- Applying frontend performance optimization techniques and clean code practices in interactive web applications.

Full Stack .NET Developer Trainee at DEPI (AMIT Learning) July 2026 – Present

- Participating in intensive hands-on training focusing on full-stack web development using C#, .NET, and SQL Server.
- Building object-oriented backend solutions, practicing clean architecture, and integrating backend logic with modern databases.
- Collaborating on practical workshops, software engineering assignments, and teamwork presentations.

Education

Bachelor of Computers and Artificial Intelligence at Beni Suef National University 2023 – Present

Department of Artificial Intelligence

- Relevant Coursework:** Data Structures, Algorithms Analysis, Software Engineering, Object-Oriented Programming (OOP), Database Management, Web Development.

Projects

E-commerce Website [\[Live Demo\]](#) April 2026

- Technologies & Tools:** Angular 21, TypeScript, RxJS, Tailwind CSS, Flowbite, HTML5, CSS3, Vercel
- Engineered a responsive frontend e-commerce platform with 10+ core viewports, enhancing user experience and navigation efficiency.
- Designed product listings, dynamic shopping cart, and checkout workflows, ensuring 100% cross-device layout responsiveness.
- Applied modular Angular architecture, standalone components, and RESTful APIs integration to optimize page load speeds.

Social Media App (Nexus) [\[Live Demo\]](#) March 2026

- Technologies & Tools:** Angular 20, TypeScript, RxJS, Bootstrap, HTML5, CSS3, Git, Vercel
- Built a dynamic web application supporting core social interactions including user feeds, posts, and interactive comments.
- Integrated RESTful API endpoints for asynchronous data fetching, reducing data loading latency effectively.
- Structured 12+ modular Angular components using Bootstrap for smooth UI scalability and clean state management.

Kanban Board Task Manager [\[Live Demo\]](#) February 2026

- Technologies & Tools:** TypeScript, HTML5, CSS3, Bootstrap, Browser Local Storage, Git
- Developed an interactive task management application to organize workflows through multi-column Kanban board layouts.
- Leveraged TypeScript strong typing and local storage persistence to reduce runtime errors and preserve user state.
- Designed a responsive UI using Bootstrap, enabling smooth task creation, editing, and status updates.

ContactHub (CRUD System) [\[Live Demo\]](#) December 2025

- Technologies & Tools:** JavaScript (ES6+), HTML5, CSS3, OOP, Local Storage, Git
- Implemented a full-featured client-side CRUD application to manage, search, and filter contact records seamlessly.
- Applied Object-Oriented Programming (OOP) principles to structure business logic and manage data efficiently.
- Built custom client-side form validation logic to ensure accurate data submission across input fields.

Skills

Technical Skills

Frontend Development: Angular (v18+), TypeScript, JavaScript, HTML5, CSS3, RxJS, Transloco, SSR
UI Frameworks & Styling: Tailwind CSS, Bootstrap, Flowbite, Responsive Design
Concepts & Architecture: REST API Integration, Component-Based Architecture, State Management, OOP, CRUD
Tools & Version Control: Git, GitHub, VS Code, Postman

Language Skills

Arabic: Native
English: Upper-Intermediate

Training and Activities

Frontend Web Development Trainee at Route Academy	2026
Mastered frontend development using Angular, TypeScript, RxJS, dynamic translations (Transloco), and modern UI architecture.	
Full Stack PHP Trainee at National Telecommunication Institute (NTI)	2025
Built database-driven web applications using PHP, MySQL, and backend architecture basics.	
Web Development Trainee at Information Technology Institute (ITI)	2024
Gained foundational hands-on training in Python, PostgreSQL, and core web development concepts.
